GUTTA PERCHA PAPER.—The known quality of Gutta Percha for resisting damp, makes it preferable to every other vegetable substance as a lining for damp walls. The superior manner in which the two sheets of paper are united with the Gutta Percha, renders this article easy of application to the wall, and complete in its effects when there.

To be had only at JEFFREY and ALLEN'S Paperhanging Factory, Whitechapel High-street.

JEFFREY and ALLEN continue to supply the Trade with block and machine-made paperhangings, combining elegance of design with good workmanship and low prices.

PAPER-HANGINGS by MACHINE and BLOCKS.—The trade supplied in town and country, with machine goods, from first-rate French and English designs, at lowest possible prices. Also block goods, unsurpassable for beauty of design, quality of workmanship, and cheapness of price. All the patterns are original, and can only be procured of Messrs. HENNELL and CROSBY, Queen-street, Southwark-bridge-road, London. Cheapest house for floral and oak decoration, marble, granite and papers, &c. &c. Small set of patterns, 5s.; returnable off an order of £1.—Terms, cash.

PAPER-HANGINGS.—COTTERELL, BROTHERS, No. 500, New Oxford-street, London, invite the attention of Architects and Builders to their superior and important collection of FRENCH and ENGLISH PAPER-HANGINGS. The stock, which is very extensive, embraces every description of paper-hangings, from the simplest to the most finished in use, and will be found in chaste design and harmonious colouring well adapted to the improving taste of the public, and at prices quite in accordance with the economical spirit of the times. The specimens of panel designs, or decorations for walls and ceilings, are well worth the inspection of patrons of trade; by novel arrangement they are fitted so that the finished effect of a room may be seen at a glance; strict attention is paid to architectural propriety and harmonious combinations of form and colour, often so lamentably deficient in this class of designs. The show-rooms are constantly open to visitors, at 500, New Oxford-street, London; and in the west of England, at Bristol and Bath.

PAPER-HANGINGS at E. T. ARCHER'S Manufactory for English, and Warehouse for English and French Paper-hangings, and all materials connected with the trade. The Panelled Decorations are fitted up on the walls of an extensive range of show-rooms, giving at one view a drawing or dining-room furnished fit for occupation.

G. BELL, and Co., No. 18, Basing-lane, Cheapside.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and those promised to customers in a fresh and perfect state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in door flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of setting with great speed. When used as a stucco it does not vegetate or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. Its superior contesting power, combined with its eminently hydraulic properties, point it out as the finest material for building sea and tank walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufactories—J. B. WHITE and SONS, Millbank-street, Westminster, and 20, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 3355, page 491; and also Nos. 3364 and 3365, pages 543 and 561 of "The Builder" for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifested. The Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the pressure of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or turn green; nor is it affected by any atmospheric influence whatever. Its chief merit, resisting alike the actions of frost and heat. It is the manufacturer's intention to preserve this reputation. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 61, Hanover-street, Liverpool.

GREAVES'S BLUE LIAS LIME, WARWICKSHIRE CEMENT, BLUE HAWN PLAIN STONE, and MARBLE WORKS, WARWICK.

AGENTS—

Messrs. Batty and Verey, 3, South Wharf, Paddington.
Messrs. Gladdish's, Paddington-green, Lambeth.
Mr. J. Thompson, Bank King-street, Manchester.
Mr. T. White, 1, Royal Bank buildings, Liverpool.
Mr. J. Harrison, Lime-hall-street, Chester.
Mr. T. H. Mercer, 103, Pargate, Sheffield.

And can be delivered by the Proprietor's own boats to any part of the kingdom.

MARTIN'S PATENT

FIRE-PROOF AND ORNAMENTAL CEMENT,

APPLICABLE FOR

ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON have only to add, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 16½ per cent. in materials, full 7 per cent less in price, with an additional saving in labour of 10 per cent., by its allowing about forty minutes for working, before the addition of the same of other cements of a similar nature, therefore worked with greater facility, making together the enormous saving of full THIRTY-THREE PER CENT.; its advantages therefore cannot admit of doubt.

Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 186, Drury-lane, London.—Manufactory, Derwent Mill, Derby.

THE PARIAN CEMENT, for INTERNAL STUCCO, which you supplied at Messrs J. & H. MORLEY'S warehouse and dwelling in Wood-street, Cheapside, in the City, has been used throughout the premises, in every story; altogether about ten thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that on the new and old brick and stone cellar vaults. I found it necessary to observe, that the plasterer's work was almost invariably followed on the next day by the painters, thereby enabling me to have the buildings completed in the shortest possible time, both for business and for the occupation of the establishments. I am, therefore, of opinion, that the use of the new material has fully justified its adoption in building operations, and fully realises that which I was given to understand, viz., that it was an extraordinary material. I think it right to mention that I am at the present time having a great extent of similar work executed at another range of buildings, where time and the quality of the work are of the utmost importance.

(Signed) JNO. WALLEN, Architect, London.

To Messrs. Chas. Francis and Sons, Manufacturers, Nine Elms.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.—The attention of the trade and the public generally is solicited to these very excellent and well-known materials, which, for their beauty, durability, impervious nature, and economy, are unequalled. THE PERMANENT WASH, as a substitute for common lime-wash or water-colour, is an article which has long been wanting for stucco and brick-work; it is of a stone colour, but may be tinted to any other; is perfectly dry in twenty-four hours; will not wash off; is very little dearer than the common washes, and, being a non-absorbent, is admirably adapted for railway stations, union workhouses, gaols, barracks, prisons, &c. One pot, is sufficient to cover, with two coats, 300 square yards. THE CEMENT, from the great reduction in price, and its suitableness for interior as well as external surfaces, places it above all other materials of its kind; it has no caustic qualities; may be painted or papered in a few days, never blisters, cracks, or vegetates; and becomes as hard as stone, and may be cleaned with a brush and water. The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, Tilt-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

GRAY STONE and WHITE FLAME LIME WORKS, BEWLAY CLIFF, on the Medway, KENT.—GEORGE POTTER and CO. having added the old and well-known business at the Pardoner Wharf, Kent-street, Blackfriars, and Camden-town, to their former town establishments, are ready to supply Contractors, Builders, Gas Companies, and the Trade generally, with Gray Stone, White Flame, and Chalk Lime, upon the usual terms. Attached is a list of their wharfs:—
